

POINTS TO PONDER

- The love of God is absolutely the opposite of the world's kind of love. God's love is about Him loving us, not about us loving Him.
- The love of God is always in movement toward us.
- God did not send Jesus just to save us so that we could get to heaven or become workers in the army of God. He came so that He could reveal His love and so that we could receive that love. The power of His love can transform our lives.
- A revelation of God's love unlocks the Word of God so that we see what He did for us.
- God is saying, "I gave you My Son. Do you think that I would hold anything back?"
- Because you are loved of God, you do not have to receive what anybody else tells you is normal for your life. The love of God gives you the confidence to say, "I am loved of God, so Satan, who do you think you are?"
- This love of God toward you is not based on anything you have done.
- When you get a revelation of how much God loves you, your heart opens to everything that He is, and that's when the most signs and wonders happen.
- Compassion means love has to take action, and this is exactly what God has done toward you in your life. He loved you so much He gave Jesus and gave you everlasting life. When you receive the compassion of Jesus and His movement of love toward you, miracles—your miracle—will follow!
- God's love surpasses any knowledge, any awareness you have in your body of pain or symptoms. You can say, "God's love surpasses that."
