

POINTS TO PONDER

- What Jesus did on the cross extended grace for all of man's needs, spirit, soul and body.
- Both the grace for forgiveness and the grace for healing are the same grace available to all men.
- When we deal with the root of sin, we step into His grace of righteousness, forgiveness, and the new creation, by faith in that grace—which includes healing for our bodies. It is a grace issue.
- Jesus simply had compassion and healed their sick; that's called grace.
- Most American medical issues are due to lifestyle choices, diet, and stress.
- The American diet supports the American medical establishment like gambling supports Las Vegas.
- If there's something that we can do to make a change, then we are responsible for it. We should be willing to change to invest in ourselves and harvest the health that God has for us.
- We're wanting to live the way we want to live, yet we still want God to heal us when we need healing.
- Diet, stress, lifestyle choices, smoking, drinking, drugs, etc. are the things that are making us sick. So, having a spirit of wisdom is just as important for healing and health as a grace miracle.
- The grace of God brings the package of forgiveness, eternal life, righteousness, health, healing, and deliverance to all men.
- For every need that you have, there is some provision for that need that already exists and has appeared to all men. In that grace, or in that raw material of life, is whatever you need for your health.
- There's more than enough grace to deal with whatever guilt trip you might be on; if it's your fault, there is grace for you.
- Some people don't believe that God is that good. They've created a God that fits in a certain box. Healing is not in that box, so they have lost out on the grace of God for healing.

- The grace of God's love is setting you free, and truth is setting you free. Your body will respond to the grace that you can see in the spirit.
- The Word of God is the seed that carries the grace that you're looking for.
- The secret power of the Christian is the grace of God that has made provision for every need, spirit, soul, and body. Jesus had compassion on the multitudes. He hasn't changed, He still has compassion for you. If you will believe that He's that good and believe in that grace, you can step over into the dimension of the grace of God, and your body will begin to respond.
- Grace should take over and eliminate sickness in your body.
